PROJECTS:

E-Commerce System

Developed this web application to learn Bootstrap and java Script functionalities.

School Management System (Database MYSQL)

I have created a well-defined and normalized database for School management system.

CAREER OBJECTIVE:

As a passionate and results-driven React.js Developer with 3 years of professional experience, I specialize in building scalable, responsive, and high-performing web applications. With a strong foundation in JavaScript, React, Redux, and modern front-end development tools and practices, I have consistently delivered user-centric solutions across diverse domains. I thrive in collaborative environments and am always seeking opportunities to innovate and refine user interfaces. I aim to join a forward-thinking organization where I can contribute to impactful projects, further sharpen my technical skills, and drive meaningful user engagement through robust front-end architecture

EDUCATION:

S.S.C (10th) (GSEB)

Shree Swaminarayan Gurukul – Dhasa (2015)

Higher Secondary School (12th): Science (GSHSEB)

Shree Swaminarayan Gurukul – Rajkot (2017)

Bachelor of Science (Bsc, Msc)

KK Shastri Government Science College – Ahmedabad (2022)

TECHNICAL SKILLS:

Frontend: Html, CSS, Bootstrap, Java Script (ES6/ES7), React (Hooks, JSX, Component), Redux

Backend: Node.js

Database: Mongodb

Tools: Git, NPM

Operating Systems : Windows, Ubuntu

PROFESSIONAL EXPERIENCE :

Total Experience : 3 Years 1 Month

Company Name : AIMS Infotek

Experience : 1 Year (1 July 2022 to 1 July 2023)

Technology : HTML, CSS, Bootstrap, MUI, React.js, Redux

Company Name : Virtual Height

Experience : 2 Year (Continue) (7 Aug 2023)

Technology : HTML, CSS, Bootstrap, MUI, React.js, Redux, Vite.js, TypeScript, Node.js

PROJECT DETAILS :

Project Name : School Management
Role : Front-End Developer (React.js)
Technology : HTML, CSS, Bootstrap, MUI, React.js, Redux
Features : Role-based Access Management, Student Performance Tracking, Automated Salary Calculation, Face Recognition-based Attendance System
Description : A comprehensive web-based application designed to streamline school operations and enhance the management of academic activities.

Project Name : OTT Platform
Role : MERN Stack Developer (React.js/Node.js)
Technology : HTML, CSS, Bootstrap, MUI, React.js, Redux,React Chat App, Firebase
Features : Location-based Advertising Display, Role-based Access (Admin, User, Sales, QA), Web Notifications, Mobile Responsive Design, Dashboard with Graphical Overview
Description : A digital media streaming platform built to deliver video content across devices. Integrated smart ad placement based on user location and implemented role-based access for different user types including admins, sales teams, and quality analysts. Developed interactive dashboards with graphical reports to track usage, content reach, and ad performance. Integrated web notification features to improve user engagement on mobile and desktop platforms.
